ON SHOW

Neue Räume

November 18-22 2015, Zurich, Switzerland

In its eighth year, Zurich design show Neue Räume exhibited designs from more than 100 carefully selected national and international exhibitors, in the 8,000sq.m ABB Event Hall in Zurich-Oerlikon. Formerly an industrial building, the hall provided a unique atmosphere for an overview of the latest trends, potentials and movements in contemporary design. Timeless classics and established manufacturers were on show alongside young and avant-garde creations. This year, the focus was on the theme of residential architecture, presenting projects by both Swiss and international architects, using new and fresh approaches in interior design to make projects accessible to visitors.

BELL42 graypants

BELL42 original elevates the beauty, function and versatility of classic scraplights. Suited to commercial and residential settings, the BELL42 has a durable dark steel frame and a recycled cardboard shade. With multi-socket lamping assemblies and sandblasted tempered glass diffusers, BELL42 provides impact and ample light.

Florinda Desnuda ModoLuce

Florinda Desnuda is characterised by baroque opulence, interpreted with light freshness. Exposed to show its structure, this lamp is realised in metallic wire folded and welded by hand to create a circular composition. The plate that supports the shades is in metal, while the light sources are retro taste lamps with carbon filaments.

SOPHIE lasfera

SOPHIE is lasfera's sympathetic veneer lighting collection. Classic in shape and traditional in craftsmanship, SOPHIE holds a flexible veneer plywood shade and foot. The plywood is made of three layers; two natural wood and one an inner fleece layer to protect the wood from breaking. Each lamp is custom made to order.
